

WRECK'T

POWER:

9v - 18v power supply - No Battery

POWER SUPPLY:

NOT TO EXCEED 18V

Negative center/Positive ring.

Please use high quality isolated power supply

CONTROLS:

GAIN: preamp gain

DRIVE: power amp style gain

LEVEL: overall volume of pedal

TREB: treble - passive

MID: midrange - passive

BASS: bass - passive

} these are standard
vintage amp eq controls

PRES: boosts pick attack frequencies

HI CUT: turn up to cut treble for a warmer tone

INTERNAL TRIM POT

extra treble cut to help match pedal to amp

the Wreck'T has a lot of gain,
it could oscillate at higher gain levels

Thank you for your purchase
